About

I'm poised to propel your company towards greater success by turning your business concepts into functional web applications. Specializing in Web Development using React JS, I also possess a solid understanding of various JavaScript frameworks, positioning me to deliver high-quality solutions efficiently.

Work Experience

junior frontend developer (remote), Al adaa 2023/10 – 2024/03
Auctiony is a web application that allows fans to participate in auctions for t-shirts and merchandise from their favorite Saudi league players and clubs. jedah, saudia arabia

- Built core functionalities for Auctiony, integrating APIs to manage data flow between auctions, player/club information, and user actions.
- Enhanced user experience by creating a bilingual website (Arabic & English) and contributing to styling edits
- Gained experience in back-end development through contributions to Node.js tasks and basic MongoDB data management.

Freelancer

I designed and implemented 'Insaniah', a charity-focused web application and a wangen pizza shop

Education

Bachelor's degree in Computer Science, Beni-Suef University 2019/10 – 2023/06
grade:-very good

Information Technology Institute (ITI) 2022/07 – 2022/09

Participated in a 60-hour front-end development course spread over two months, learning HTML, CSS, JavaScript ,bootstrap and react. This immersive training focused on responsive design and practical project work, laying a strong foundation for my career in web development.

Projects

Portfolio [🔗](#)

Welcome to my portfolio, where I showcase my frontend development projects. Built using **React**, **Framer Motion**, and **Tailwind CSS**, the site highlights my skills with dynamic UI, smooth animations, and responsive design.

Wangen Pizza [🔗](#)

- Designed and developed a front-end for a Swiss pizza restaurant website using React.js
- Implemented features for online ordering, table reservation, and contact form submission.
- Integrated a shopping cart and facilitated local payment via Twint.
- Utilized Redux Toolkit for efficient state management and SwiperJS for creating sliders.
- Streamlined user experience with React Router DOM for seamless navigation. (Optional) Briefly mention the Stripe integration and removal upon client request, showcasing your adaptability.

"Everything in the project was done based on the client's wishes, even the programing languages used."

Gosto [🔗](#)

- Developed Gosto, a React.js e-commerce web app for phone mockups.
- Implemented user-friendly search, cart, & filtering for a seamless shopping experience.
- Built with React Router, Redux Toolkit & Sass for smooth navigation & management.
- Offers trendy phone mockups with a focus on variety.

Brainwave [🔗](#)

- Co-created Brainwave, a React.js and Tailwind CSS website showcasing modern UI/UX principles.
- Focused on user-friendly design, animations, and cutting-edge practices.

- Brainwave serves as a reference for future high-standard web applications.

Insaniah

- Built a charity web app (HTML, CSS, JS) to gather donations for global communities.
- Designed & developed user-friendly interface for promoting social impact & generosity.
- Showcased web development skills for a cause I care about.

"Everything in the project was done based on the client's wishes, even the programing languages used."

Development

html | html5 | css | css3 | sass | js | ES6 | bootstrap | tailwind css | ajax | axios | React js | context api | redux | redux toolkit | material ui | solid principles | oop | data structure | algorithms | problem solving | sql | mongo-db | angular (low knowledge) | node js (low knowledge) | git | github | fundamental of networks (ccna & mcsa)

Soft Skills

- Communication: Bridge the gap between technical and non-technical teams.
- Teamwork: Be a collaborative player, sharing knowledge and fostering success.
- Time Management: Deliver high-quality work consistently, meeting deadlines even with surprises.
